### **DETAILED ACTION**

The following is an examiner's statement of reasons for allowance:

Glenn et al disclose an interconnect substrate (13) having a plurality of substantially identical package sites (12) arranged in an array, the plurality of sites being separated by a singulation space (56, 58) and the interconnect substrate being a ceramic substrate or a rigid printed circuit board substrate (col. 2, line 47); mounting and interconnecting a semiconductor device (30) within each site; a cavity containing the plurality of substantially identical package sites (Fig 3a, 3b); and overmolding a single and continuous encapsulant over each semiconductor device, the plurality of sites, and the singulation space (col. 4, lines 59-63),

The limitation "wherein overmolding produces a top surface of the continuous encapsulant which has a surface deviation of less than 0.13 millimeters across the top surface of the continuous encapsulant" in combination with other limitations present is neither taught nor disclosed in the prior art of record.
